<p>STATUS: Texas Eastern Products Pipeline Terminal (TEPPCO) is located between Seymour and Reddington in northeastern Jackson County. In 1987, IDEM staff responded to area residents complaints about petroleum products in their well water. Extensive sampling detected petroleum products in the wells. TEPPCO has provided several effected residents with public water. In 1987, TEPPCO hired a consultant to conduct an investigation at the facility.</p> <p>IDEM is currently developing the Record of Decision (ROD). The ROD details the final action at the site. It was determined based on all available information that continued monitoring of the site is necessary. A new Agreed Order for the Operations and Maintenance phase is currently under negotiations.</p>
